[1975-76 academic year]

The Martlet

UNIVERSITY OF VICTORIA 1975 EDITION

SPECIAL EDITION
This an annual supplement prepared by the University of Victoria student paper for prospective UVic undergrads.

If you're thinking of going to university...

...look inside

An Editorial

My Bias

By Martlet editor Greg Middleton

Why go to University?

The purpose of this paper is quite obviously to let you know what there is at the University of Victoria and attract you to come here.

A number of you may very well ask "why should I go to University in the first place?" Counsellors and people at Canada Manpower and probably your parents as well will say "go to University so you can get a better job". They are right. If you go to University, work hard and get a good degree you can get a better job, but in the four years you spend here you could also work your way into a job and make quite a bit of money.

Some of your teachers will tell you to go to University to get a better education. They're right, you can certainly learn a lot at University in four years. Some of it you can use, some of it you can't; but why go to University, you can learn a lot in the bush, you can learn a lot in the street.

You can also ask someone like me why you should go to University. I should know, I've spent more time here as a student than most people.

I'll tell you why you should go to University. It's a nice place to spend a few years. You'll never get another chance to be with a group of people who are all interested in learning and experimenting. University is a place where you can be free to search and inquire into all the different things that man has done and is doing. It's a chance to learn about other people and things and about yourself. University is a place where you can form the base upon which you build the kind of person you are. At University you can make that base as broad and informed as you like. In University, society has collected most of mankind's knowledge. It has tried to group together the brightest and the most creative people in an atmosphere of freedom. University can be an exciting place to be.

There are a lot of reasons why you should go to University. What I'd like to know is why you should pass up the chance to go.

What is the Martlet?

The Martlet is a student newspaper, a real student newspaper. It is financed partly by the students through the fees each student pays at registration to the Alma Mater Society, and partly through advertising. It is typeset and layed out by students in a modern offset typesetting shop the students paid for. It is organized and run by students, independent of the faculty, the administration and even the student government. Most important — it is written by students.

In the past the Martlet has been the voice of student opinion. It has been responsible for leading the students and forming their opinions. It has also on occasion been a complete flop, but it's still a student paper.

There have been times when the paper has been criticized for being: too radical, too conservative, obscene, pornographic, in bad taste, irrelevant, and a dirty, commie, hippy rag; but it's still a student paper.

While you're at UVic you can get involved in the paper. It is an open forum for students. If you want to get involved and write news stories you'll find it is the best way to find out what is going on around the campus. If you find something that would interest other students you can write a feature piece and really become involved with an in-depth study. There are books, plays, and movies to review.

The actual production of the paper is also an interesting and challenging thing to get involved in. The layout and paste-up of this paper is a way of learning about newspaper design by doing it.

The Martlet is one way to really get involved with what is happening on campus, it is also a way to learn journalism. Most of last years staff who wanted jobs on papers got them. Last year's editor is a reporter for the Calgary Herald. Several people who wrote for the paper last year have summer jobs on weekly papers. Most of the people who worked on the production of the Martlet got jobs on a local weekly paper that has been expanding recently. I have been working as a free-lance writer and selling stories on a fairly consistent basis.

If you are interested in becoming part of the Martlet staff, drop in and see me anytime. The office is in the Student Union Building .

President's message

The potential of this young university -- it's only 12 years old -- is what drew me here. In addition to its already wide variety of academic programmes and its increasing stress on professionally-oriented courses, I foresee the University of Victoria making, within the next decade, a major impact on such contemporary concerns as environment, social welfare, health and whatever confronts the individual human and his or her well-being in a particularly difficult age. It is to these ends we hope to attract highly-committed students and provide them in turn with quality educational opportunities, and, of course, to a vital, personal campus that is located in what is probably one of the most beautiful settings in Canada.

Dr. H.E. Petch, President

AMS President's message

The Alma Mater Society is the legally incorporated society of students of the University of Victoria. It is the recognized means of communication between students, faculty, administration, and the outside community. The governing body of the Alma Mater Society is the Representative Assembly, which consists of 22 members elected in February of each year.

The administrative officers direct the day-to-day activities of the Society. The President presides at all meetings, acts as chief spokesman of the Society, and also serves as liaison for the students both individual and corporate of the University.

The Vice President handles many functions, including relations with other student groups, student representatives on University committees, and the day care centre.

The treasurer is responsible for all business matters of the Society and the Communications Director for intra-council communications and communications between all facets of the University. The Academic Affairs Chairman is responsible for representing undergraduate students on all academic matters within the university, and for organizing debates, symposiums, and the Society's speakers programme. The Activities Co-ordinator is responsible for the production of social activities such as dances, concerts, the pubs and cabarets. The Clubs Director acts as the liaison between all A.M.S. clubs and the Society itself. The Publications Director is responsible for the Martlet, the telephone directory, and all other A.M.S. publications. The Athletics Chairman sits on the Athletics Directorate, and is the students' voice in the University Athletics programme. The Student Campus Development Chairman is the representative of the Society in the University's decisions concerning building, grounds, and housing, is responsible for the Student Union Building and represents the residence students to the Society. Finally the Chief Electoral Officer is responsible for all elections, referendums and their implementation.

In addition there are 11 student representatives who are elected at large and who are responsible for voicing student opinion at Council meetings. All of these persons are willing to help any student with a problem he or she may have, and all may be contacted at the Student Union Building.

The A.M.S. levies a $32 membership fee per full-time student, collected by the University for the Society. Of this amount, $10 goes directly into the Student Union Building Expansion Fund, $6 goes directly to the Athletics Directorate to support the athletic programmes on campus. The remaining $16 goes towards the maintenance of the programmes, services and offering of the Society. Part time students (for A.M.S. purposes, those carrying less than nine units) contribute a $2 per unit A.M.S. fee which is allocated on the same basis as for full time students.

The programmes of the Society can generally be divided into four areas of concern: administrative, academic, service, and community. Under "administrative" is placed the day-to-day operation of the Society, the operation of the SUB with its various facilities, the placing of Society representatives on committees both within the University and in the outside community. Those members of the Assembly concerned with academics actively investigate such matters as course and professor evaluation, examination procedures, tenure and promotion, university government, student awareness of the many facets of campus life, and co-ordination of both the bookstore and the library.

In the services area the Society acts to provide the student with many activities and facilities designed to increase and enhance his or her overall education, including clubs, publications, activities, athletics, charter travel, nursing and day care facilities, student housing, traffic and parking facilities, etc. Finally, those university students interested in the problems in the community in which they live, can through the Alma Mater Society, organize groups concerned about problems, conditions, and activities within the greater society.

Clayton Shold

Office on the third floor of the MacLaurin Building Mac. 323
Telephone 477-6911 Local 676

How to apply....

...for admission

EARLY NOTICE OF ADMISSION: If you are graduating this June and are maintaining at least "B" average on all grade XI and XII courses, you may apply for early notice of admission through your Principal's office. Full details are available there.

GENERAL ADMISSION: Students who are not eligible to apply under the Early Notice of Admission procedure should acquaint themselves with the new entrance requirements published by the University and circulated to the schools in January 1975.

Applications will be available through your Principal's office. You may apply either through your school or on your own. Applications must be received by the Admissions Office of the University no later than July 31, 1975. For further information, write to the Admissions Office, University of Victoria.

Undergraduate degrees offered:
B.A.
B.Ed.
B.F.A. (Theatre, Visual Arts)
B.A. (History in Art, History in the Arts)
B.A. Child Care
B.S.W.
B.Sc.N. (open to Registered Nurses)
B.Sc.
B.Mus.

...for financial aid

CANADA STUDENT LOANS - PROVINCIAL GOVERNMENT GRANTS - Students applying for this combined assistance should write to the Financial Aid Officer at the University of Victoria any time after June 1st, 1975. In order to ascertain prior to registration, whether or not you will be given assistance, the **completed** application form should be returned to the Financial Aid Office by July 9, 1975. Be early!

UNIVERSITY OF VICTORIA ENTRANCE AWARDS - Entrance awards administered by the University of Victoria must be applied for prior to June 30th, 1975. For furthe details on awards available, refer to the back of your UVic Calendar under the section entitled 'Awards and Financial Aid', Section 1. Application forms for these awards may be obtained from the Financial Aid Office at the University of Victoria.

IS THIS WHAT YOU HAD IN MIND?

The Library

is a good place to meet your friends, read a book (we've got over 600,000), avoid enemies in over 15 miles of stacks, listen to a record (15,000 discs and growing), view a microfilm (1,000,000 plus pieces) or rest between classes.

We are strategically located: almost any straight (or weaving) line drawn between the Pub and a class-room passes through the Library. This useful fact should not be overlooked in planning your course schedule.

Boast:

we offer you more books per head than almost any other university in Canada. Stuff for courses (of course) but also information answering all those questions you were afraid to ask in class and all the bits they left out of the movie. Read (free) until your eyes bubble!

Our Motto

students are our business. Or without students we'd be out of business. We try hard and would like to try harder - give us a try.

Astounding number:

1,050,000,000 pages of information are published every day. And they said the age of the printed book was over. Shame.

COUNSELLING CENTRE

FOR INDIVIDUAL HELP:
to get information
to make occupational choices
handle personal concerns
to find better ways to study
to make educational choices

TO JOIN A GROUP ABOUT:
self-confidence
personal growth
communication skills
anxiety reduction
reading and study skills

OR

to just have a chance and a place to talk about whatever you want with someone who will listen and help you reach your goals.

READING AND STUDY SKILLS COURSES

August 18-29, Transition Programme, reading, study, and library skills for the new student, $20.00.
September and January, 6 week academic survival course, 3 sessions a week, $10.00

All Counselling is Confidential and Without Charge

WALK IN: 107 Clearihue - the one with the clock tower
PHONE: 477-6911, Locals 347, 348, or 623.

STUDENT ACCOMMODATION

Residences

Applications for residence accommodation are available March 1st and may be obtained by writing to:

Housing Services
P.O. Box 1700
University of Victoria
Victoria, B.C.
V8W 2Y2

Interested students are advised to apply early. Priority is given to out-of-town students attending the University of Victoria for the first time, and rooms are assigned on a first-come, first-served basis.

Off Campus

Housing Services maintain listings of off-campus accommodation. Students may consult the file cards in Lansdowne Office Wing which is open from 8:30 a.m. to 11 p.m.

ONCE UPON A TIME
THERE WEREN'T
TOO MANY BOOKS
OR THINGS TO GO
AROUND
NOW there's plenty of books for everybody
and you'll find them at the UVIC BOOKSTORE

The Bookstore, located in the Campus Services Building, is owned by the University and operates on a break-even basis.

All required and recommended textbooks are stocked by the Bookstore according to Faculty requests and (with a few exceptions) are sold at a 5 per cent discount.

In addition, the general book section provides a wide range of background reading, reference material, books of interest and entertainment and magazines.

Any book in print can be ordered on special request.

Our Campus Shop, located opposite the Bookstore offers school supplies, stationery, posters, greeting cards, art supplies, crested and sports ware, a general selection of drugstore items and a Post Office.

Come and browse at the University Bookstore and Campus Shop at Your convenience Monday to Friday, 8:30 to 4:30 p.m. (summer hours).

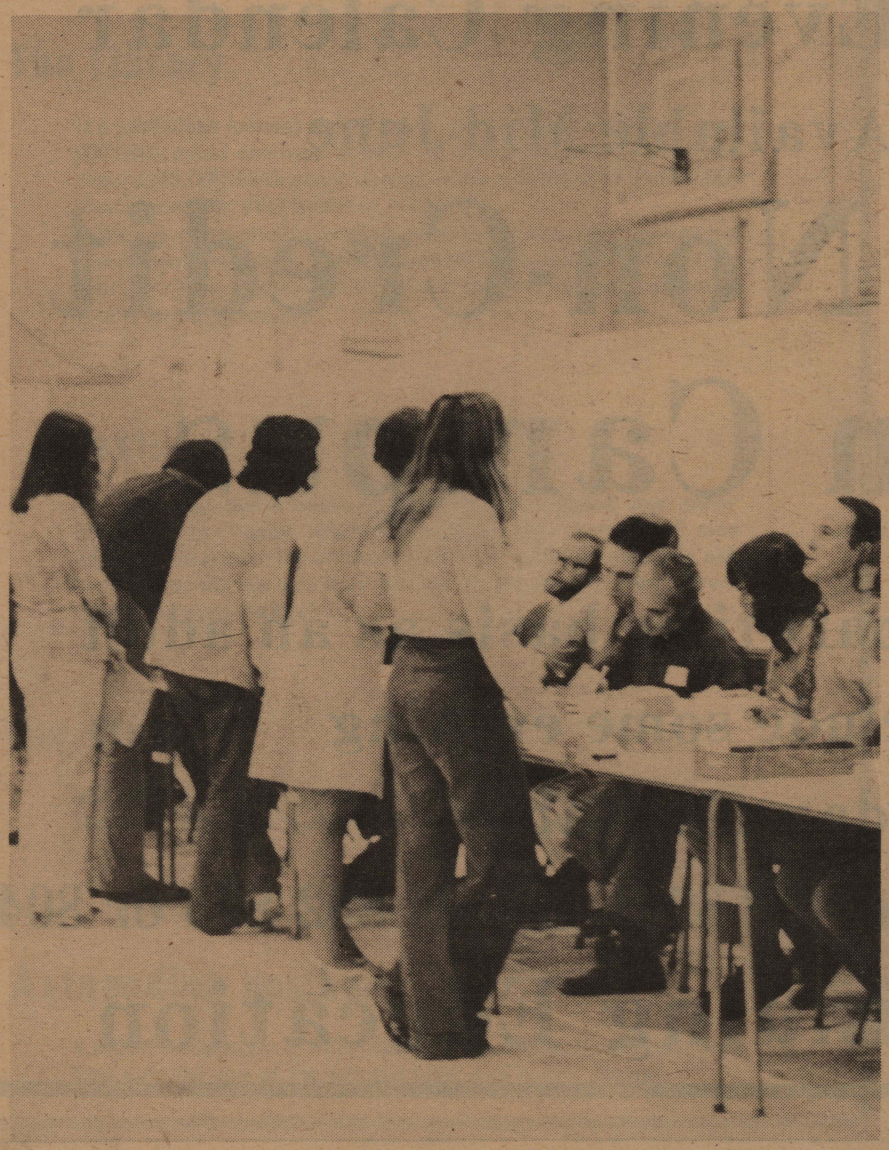
How to survive your first day at UVic



MAINTAINING YOUR SANITY ON YOUR FIRST DAY AT UVIC

1. Make sure you pay all your mandatory fees before Registration Day itself. If you don't you will spend hours running from one lineup to another.

2. Know what courses you want to take before you register. Trying to decide at the last moment can be a frustrating experience. Also, you will prevent hasty decisions which lead to a whole misery in classes in which you have no deep interest.

3. If possible, talk to students who have already taken courses you are considering enrolling in. Find out what the professors are like and how well they teach. Unfortunately, the Academic Guidebook will not be available from the Students Union this year.

4. Work out your timetable in advance. This saves mindbending headaches and guarantees you a place in classes with limited enrolment. Course timetables are available in the Students Union Building and the Registrar's Office before and during Registration Week.

5. If you cannot be placed in a course you want, it is usually possible to transfer into it during the first two weeks of classes following Registration.

6. During the first month of classes, the UVic Bookstore is jammed. Buy your texts as soon as you can. If you have a required course get the books for it before Registration. ALWAYS keep your receipts, otherwise the store will not grant any refunds.

IF YOU ARE GIVEN A LENGTHY LIST OF BOOKS FOR A PARTICULAR COURSE, DO NOT BUY THEM ALL AT ONCE. Wait and make purchases as the need to do so arises.

7. Your picture will be taken when you register, so if you have been up all the previous night and look it, you're stuck with the evidence for a whole year. This becomes a source of amusement to librarians and others to whom you must show your AMS card.

8. Finally, arrive for Registration well in advance of when it starts. It's first come, first served in enrolling for courses with limited numbers of only one section. And those lineups....

Philosophy Irrelevant?

YOU DECIDE!

These offerings are of general interest and are open to students in any year including the FIRST.

PHIL 202. (3) Argument, Fallacy and Logical Theory, taught by John Woods.

An important aspect of human competence is a capacity for clear thinking, cogent advocacy and telling criticism. In the first part of this course conditions for the success and failure of such undertakings are pursued in an informal way. A review is made of various deficiencies, fallacies and paradoxes of everyday reasoning, and their repair is attempted. Different logical traditions are noted, including the Aristotelian and Indian schools of thought, and relevent differences between Rhetoric, Dialectic and pure Logic are also attended to.

The second half of the course develops an elementary formal theory by which to represent the basic logical structure of natural languages such as English. As the theory unfolds a number of key concepts are investigated, among which are: truth, proof, validity, necessity, contradiction, consistency, meaning, existence, and generalization. Part of the design of the course is to present issues that may prove relevant to an understanding of achievements and problems in other areas of study.

Text: John Woods, Proof and Truth: Mathematical Logic for Non-Matematicians.

PHIL 269. (3) **The Self, Communication, and Understanding, taught by Rodger Beehler with the co-operation of members of the Departments of Linguistics and Psychology**

In the first term, an introductory philosophical investigation of contemporary theories of the self as developed in the work of psychologists, psychiatrists, and sociologists. Among the questions to be asked are the following. Can we divide people into the normal and the abnormal without appealing to some special privileged conception of what people ought 'really' to be like? Upon what sorts of things does a person's conception of himself depend, and how far is this conception of himself sensitive to the way other people appreciate or treat him? Is mental illness a disease of the self or a matter of diseased relations between the self and other persons? Are disturbances of the self at bottom symptoms of disturbed communication between selves?

In the second term, an introductory philosophical inquiry into communication between persons, the relation of thought to language, and the connection between the thought of an age and its prevailing media of expression. Among the questions to be pursued are: What sorts of things prevent communication between persons? What sorts of things give rise to misunderstanding? Do people, who have radically different languages have as a consequence radically different world views? Are there limits to our understanding of peoples of different times and cultures? Are all languages capable of mutual translation, or can some things not be said in some languages?

Texts: E. FGoffman, **The Presentation of Self in Everyday Life, Asylums**; R. D. Laing, **The Divided Self, Sanity, Madness and the Family**; E. Weil, **The Natural Mind**; A. H. Maslow, **Towards a Psychology of Being**; B. Whorf, **Language, Thought and Reality**; M.McLuhan, **Understanding Media**; **McLuhan: Pro & Con** (ed. R. Rosenthal); J. Miller, **McLuhan**; H. Arendt, **The Human Condition.**

PHIL 332. (3) **Eastern Philosophy** taught by A.R. Drengson.

The main emphasis in this introductory course is on the major philosophic traditions of the East: Confucian, Taoist, Buddhist and Hindu. Readings from original texts, such as the **Analects, The Tao Te Ching, The Upanishads,** and others, form the basis for class discussions. An effort is made to compare major teachings of Eastern Philosophers with those of Western Philosophers.

Texts: **Upanishads; A Source Book in Chinese Philosophy** (ed. Chan); **Bhagavad-Gita** (tr. Isherwood); **Radhakrishnan, The Hindu View of Life; The Teachings of the Comp Buddha** (ed. Burtt); **Su uki, Training of a Zen Buddhist Monk.**

Course assignments: Careful and extensive reading and discussion of primary texts, a term paper and essay exams given in class.

Enquiries Welcome: Members of the Department available for consulation. Offices in Sedgewick Building (Phone Local 619).

Department of Psychology

GENERAL, MAJOR AND HONOURS PROGRAMMES

Several undergraduate programmes are offered by the Department of Psychology. The concentration in the General programme is designed to provide flexibility and a general background for students planning to enter other fields as diverse as social work and journalism. The Honours programme is recommended for students planning graduate work in scientific or professional psychology. The Major programme requires a degree of specialization in the last two years and may permit the student to proceed to graduate study or to professional training or business careers if sufficiently high standing is obtained. A student may proceed to either a B.Sc. or B.A. in psychology. A student taking a Major or Honours programme is encouraged to consult a member of the Department early in his academic career.

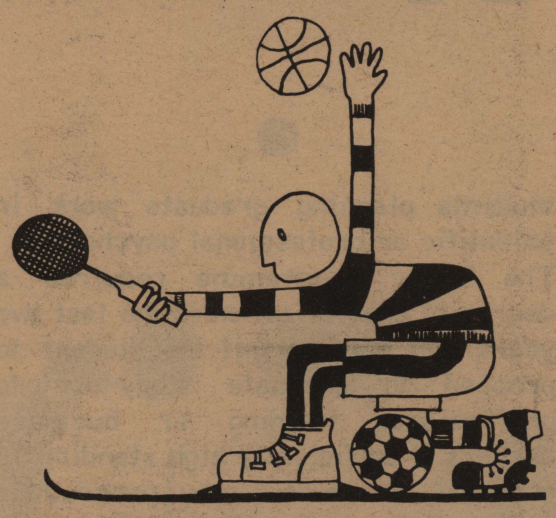
Athletics and Recreation



University of Victoria's newest and most popular facility, the McKinnon athletic complex, affords a comprehensive Extramural and Intramural-Recreational programme to members of the university community.

EXTRAMURALS: University teams are represented in intercollegiate competition in the following areas:

Basketball: Coach Gary Taylor
Cross Country: Coach Larry Corbett
Curling: Sponsor, Skip Bryan
Field Hockey: C. Wilson, C. Montgomery, N. Zorkin
Gymnastics: Coach P. Kopac
Ice Hockey: Coach R. Maxwell
Judo: Coach Peter Lam
Rowing: D. White, W. Van Osterhaut
Rugby: A. Rees, K. Wilke, H. Gerwing, M. Penn
Soccer: Coach Brian Hughes
Skiing: Ken Brown
Track & Field: Coach G. Dumas
Volleyball: Al Scott, K. Andrews
Water Polo: Bob Jurncee.

INTRAMURALS: Recreational leagues are organized for scheduled on-campus games in the following areas:

Soccer
Floor Hockey
Volleyball
Innertube Water Polo
Basketball
Ice Hockey
Tennis
Snooker
Badminton
Water Sports

RECREATION: Instructional classes are offered in:

Golf
Squash
Recreational Gymnastics
Survival Swimming
Womens Keep Fit
Skin Diving
Beginners Swim
Social Dance
Judo
Jazz Fitness
Womens Self Defense
Yoga
Karate
Swim Improvement
Creative Dance
Springboard Diving

The dance studio, apparatus gym, weight room, swimming pool, squash courts and main gymnasium of the McKinnon Building, as well as the gymnasium and weight room of the Old Gymnasium, are available at designated times for general recreational use by the members of the university community.

FOR INFORMATION WRITE OR CALL MIKE ELCOCK, ATHLETIC DIRECTOR, McKINNON BLDG., UNIVERSITY OF VICTORIA. 477-6911 local 355 or 790.

UVic application forms available

If you are interested in coming to the University of Victoria, now is the time to get working on it or you could find yourself either unable to come this year or paying a late penalty.

The first thing to get is an **Application for Admission.** If you write to the **Director of Admissions,** University of Victoria, he can send you one.

If you are in Victoria, you can pick up an application at the University. The Admissions office is in M building. (Ask for directions) Also ask him to send you a **calendar.** It is the official document that outlines all the requirements and deadlines as well as outlining all the courses and programmes. It is the University's equivalent of the bible.

You will also need the official transcripts of your academic record. You can get these by writing to the **Department of Education, Division of Examinations and Transcripts, 716 Courtney St., Victoria.**

The deadline is **July 31** for all applicants except those who are **transferring** from other colleges in B.C. The deadline for them is June 30. This deadline is the last day they will accept applications without assessing a late fee. Mail your application well before the deadline. If you are accepted you will get an authorization to register. Don't lose it. If you are not accepted you will get a letter explaining why.

Do everything early-it saves a lot of trouble.

UVic exchange programme

One of the most valuable services the AMS performs is its nine year old Foreign Student Exchange Programme.

At present this programme sends two UVic students to attend Keio University in Tokyo, Japan. The cost to the AMS is $5,000.

While in Japan, exchange students take intensive language courses, both conversational and grammatical. There are additional courses in literature, history and cultural aspects of Japan. Accommodation for the exchange students is arranged by Keio with a nearby host family or suitable room and board.

Japanese exchange students at UVic engage in an English language programme and are housed at the residence buildings.

Students who desire to enter the 1975–76 programme should apply to the AMS Foreign Exchange Chairman this fall. Any interested, registered UVic student is eligible.

Hopefully in the future, more exchange programmes with other countries wi'l be initiated.

Counselling Centre is there to help...

The University of Victoria has a counselling center to help you out if you are having any problems at University.

As well as career counselling they can help you learn more efficient study skills and effective learning techniques. They can show you ways of organizing your time and your notes, increasing your reading speed and comprehension.

The Counselling Center administers the admission and aptitude tests that a number of professional schools require. These include the Medical College Admission Test and the Law School Admission Test.

The counsellors are also available to help you with any personal problems that you may have while at university.

Dr. Ace Beach, head of the Counselling Center, is head of a committee to look into the welfare of students. One of the aims of the committee is to look into the idea of setting up an independent body that could deal with any problems with faculty or staff.

...so is the Health Service

The Student Health Service is organized to provide for the health needs of students during their time on Campus. The Health Service physicians would like to feel that they take the place of your family doctor when you are living away from home, but in no way wish to interfere with your relationship with him.

Proper treatment and care, even for mild ailments, if started early will usually prevent more serious illnesses and loss of time from classes. You are urged to visit the Health Service early for any matter of health.

The office is open 8.30 a.m. to 4.30 p.m. daily Monday to Friday.

Doctors in attendance from 10.00 a.m. to 2.00 p.m. and 3.00 p.m. to 4.00 p.m. daily Monday to Friday.

All medical records are confidential. The Health Service will be willing to supply your personal physician with relevant information but you will have to make this request yourself. All immunizations and tests are given for travel, and it is suggested all students report for a tuberculin test.

The Health Service is situated at the East end of Craigdarroch and Lansdowne Colleges, in parking lot 5.

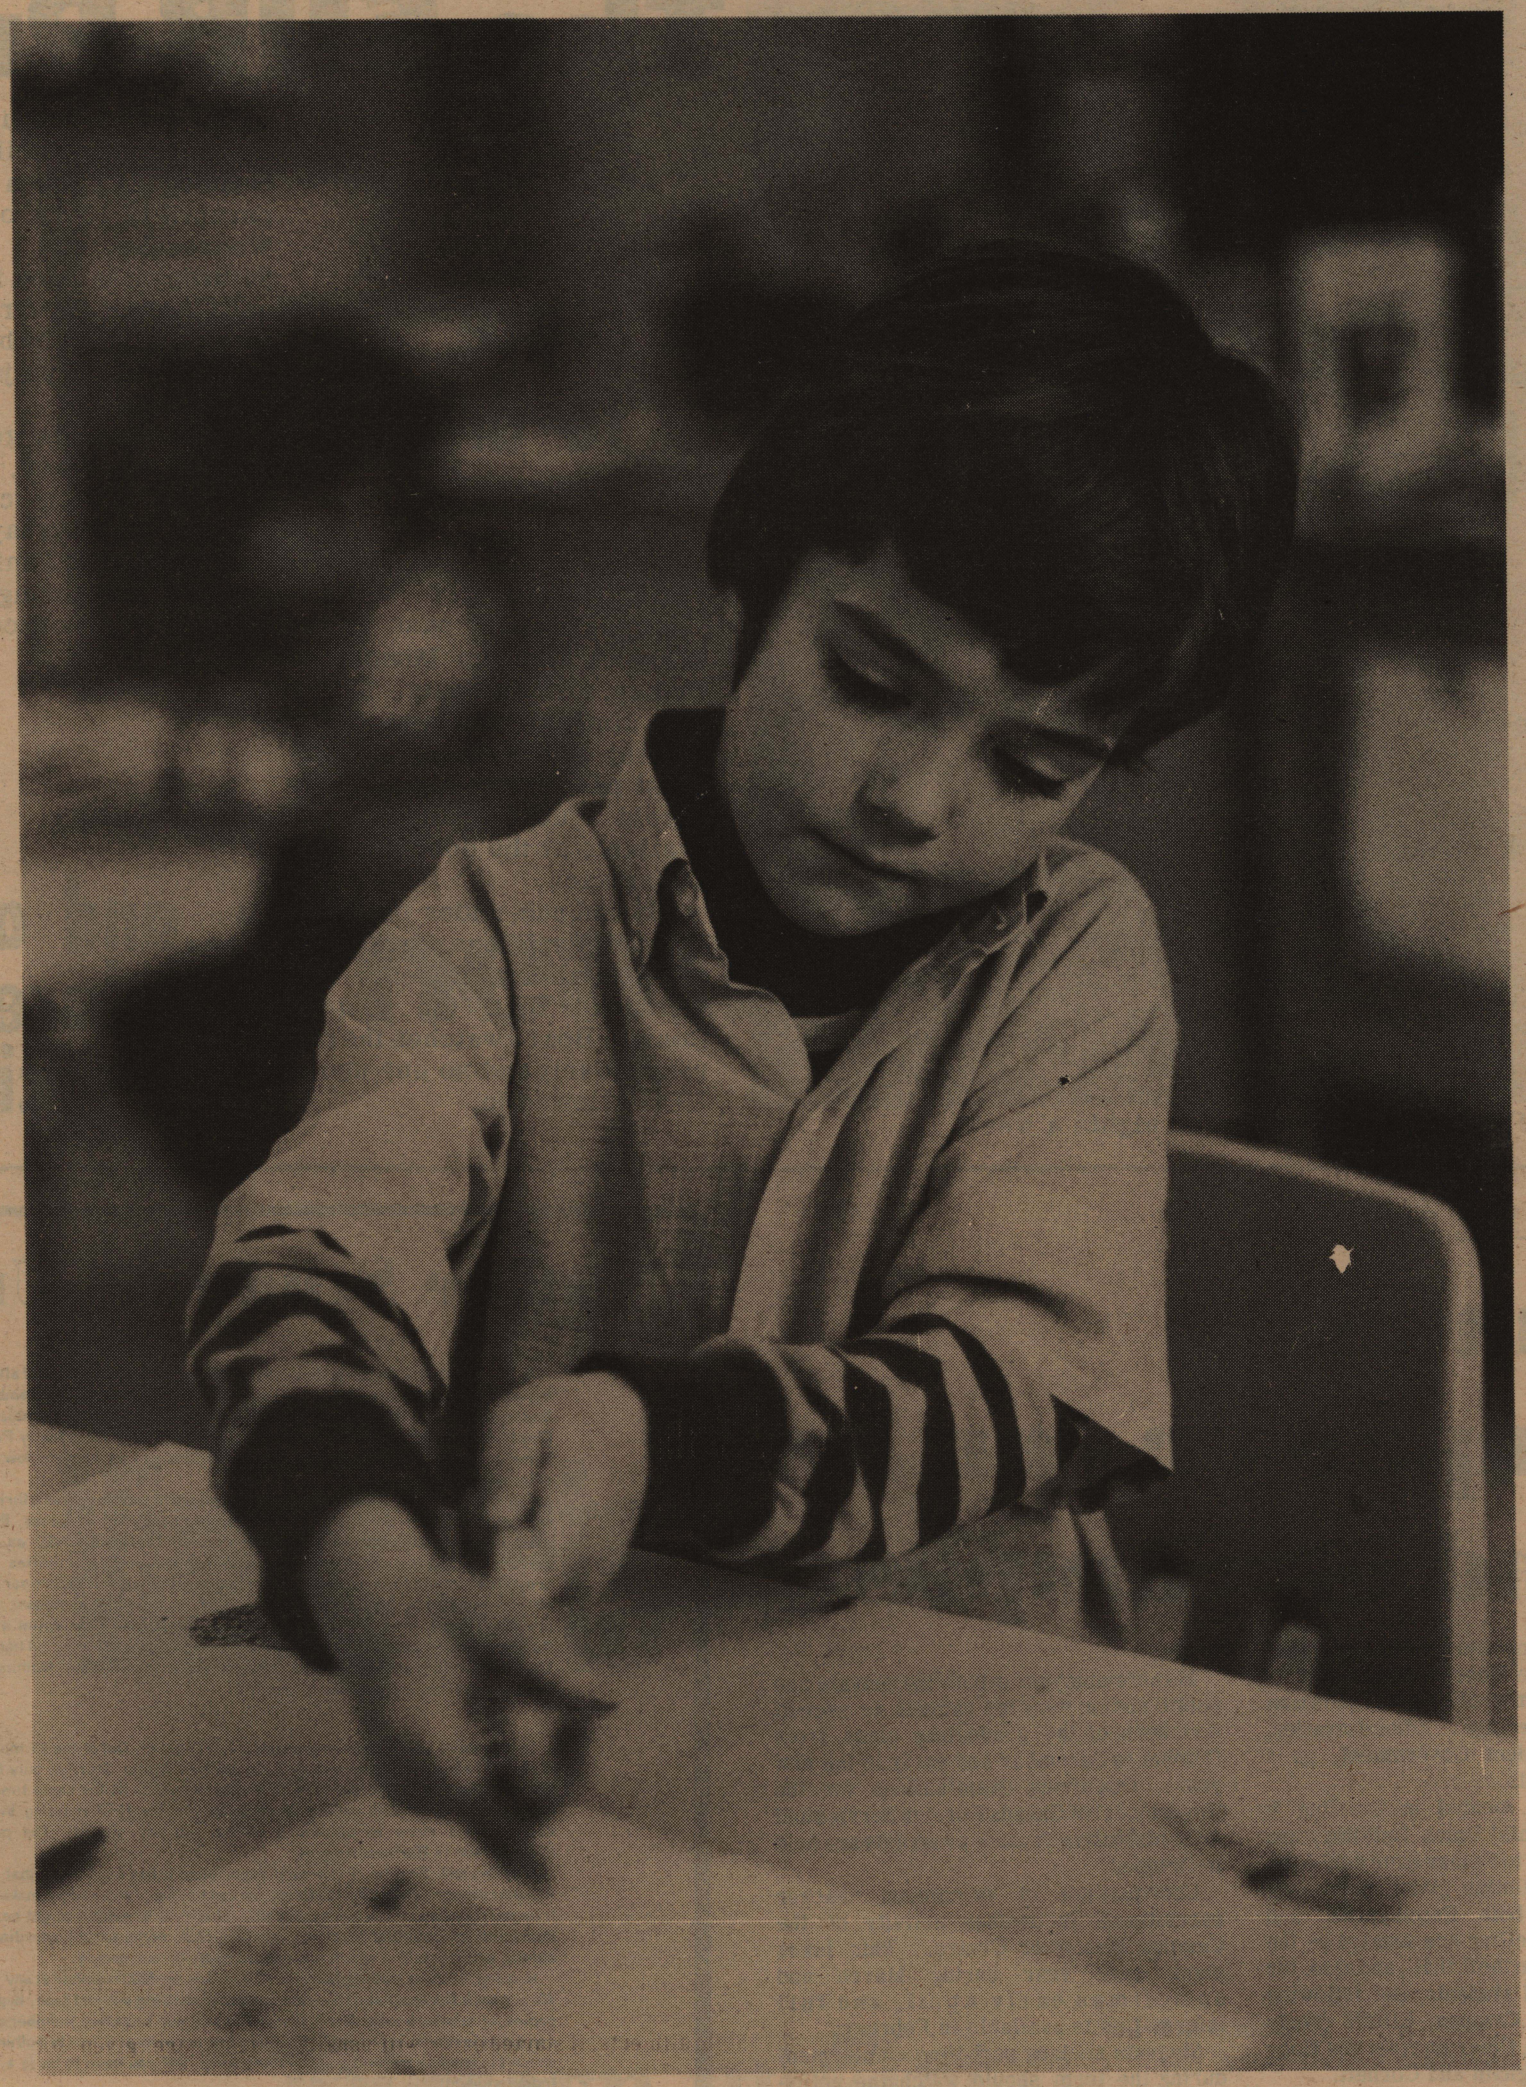
UVic Library "a useful tool"

The University of Victoria has one of the best Libraries you are going to find, it is a good student's most useful tool; but it is a complicated tool to use properly.

Every year the Library has a programme to initiate new students into all the services the Library offers. There are records, magazines, newspapers and microfilmed material as well as books. It takes a little knowledge and skill to find all the material in the Library, so you are advised to look into their initiation programme. The Martlet will have further information about this in September.

It is also a good idea to read the loan regulations very carefully because the fines can really mount up if you are not careful.

INTERESTED IN EDUCATION?



CONTACT:
THE EDUCATION ADVISING CENTRE
UNIVERSITY OF VICTORIA

UVic's Subpub runs three nights a week.

The SUB Pub

A place to drink...

The AMS Subpub is probably the best used facility in the building. It is open from 4:30 pm until 12:15 am on Monday, Wednesday and Friday. Saturday it is open from 9 pm until 1 am. On Friday night there's a live rock band and on Saturday usually a jazz or folk musician.

UVic students get in free during the week, there is however, a fifty cent cover charge on Saturday and the Saturday pub is limited to two hundred people. UVic students may bring guests by obtaining a guest pass at the SUB general office between 8:30 and 4:30 pm Monday to Friday, for fifty cents. There is a limit of one guest per student and a total of fifty guest passes per night. Any unsold guest passes are available at the door for one dollar each.

The Subpub, under manager Gordon Teel, has been very successful but students are reminded that the Liquor Control Board watches the pub very closely and no one under 19 is allowed in.

...and a place to socialize

Looking for a job?

Canada Manpower can be found on campus

The Canada Manpower Centre on campus is operated by the federal Department of Manpower and Immigration in co-operation with the University Administration, Faculty, and Student Government, as a service to students.

The Centre is located in Building V (behind the Students' Union Building) and operates Monday to Friday from 8:00 A.M. to 5:00 P.M. Bulletins giving day-to-day information on both Employment and Vocational Counselling are located in the Centre itself and in the S.U.B., and also, for the convenience of students, the following Buildings on the Campus: Elliott (study wing), MacLaurin, Clearihue (second floor old wing), Cunningham and Cornett.

Career counselling is available at the Campus Canada Manpower Centre. In addition, career briefing sessions by representatives of various occupational groups are scheduled on campus at different times during the year. Notices giving details about time and place are posted on all bulletin boards. Reference material dealing with careers is available to students in the newly-developed Careers Room.

Major employers in both the private and public sector visit the campus to recruit members of the graduating class from October to December and early in the new year. Qualifying examinations for the Government of Canada Foreign Service and Administrative Trainee programs are held in October.

Coordination of on-campus teacher recruitment is another activity of the Campus Manpower Centre. This takes place each year during March and sometimes early April, and full information is available in February.

Students seeking part-time employment during the term should watch the notice boards for details of specific job vacancies. On-campus interviews for summer jobs are held any time between November and April. Again, all specific information will be posted on the bulletin boards.

Students are invited to visit the Campus Manpower Centre in September to acquaint themselves with the facilities available and to consider registration for employment.

The AMS film society will need projectionists in September. If you have experience leave your name at the SUB.

Native Students Union

In 1970 the Native Students Union (NSU) was formed. It consisted of all native Indian students attending the University of Victoria. Among its members at that time were Bill Wilson (now working in the Union of British Columbia Indian Chiefs) Deanna Sterling (now teaching in Smithers, B.C.) and Molly Pelky (a home-school coordinator working in rural Saanich) to name a few of the original members.

During the first two years the NSU was involved in such things as a three-day-workshop and a film series run over the summer months. However, the NSU found out something then which has been transmitted to the NSU as it now exists. That is that one could become so involved in NSU activities that it proved detrimental to one's university training. During the 1972-4 period the NSU, consisting by then of less than half of its original members, took a breathing pause. In each of those two years it was decided in the initial meeting that the NSU member's first priority was trying to pass courses. Therefore, the NSU during that period voted to be an informal club only. Nothing of an organized formal nature was attempted.

In 1974 three NSU members graduated with degrees. Out of the 21 members of the NSU who attended university in the 1973-74 Winter Session, only five or six were back to attend the 1974-75 Winter Session. At the same time NSU membership doubled to include 36 students. In the first meeting the NSU decided once more to become a formal activity group. The present Chairperson is Barbara Higgins.

Why this ad? Simple. From past experience it has been found that native Indians who attend UVic for the first time can find help and simply make more friends from the start by going to the NSU 'office', wherever it might be. NSU members are potential teachers, professional, home-school coordinators, chiefs, artists --all of which are needed badly by our people.

Nothing, I repeat, nothing heavy will be laid on any NSU member at any time. We are not a bureaucratic monster computer spitting out red tape, duplicate copies, or numbers to confound, amaze and awe our stupefied members. You can get as involved as you want. Membership is automatic, costs nothing, but doesn't in any way commit you to do anything. All you have to be is a native Indian student.

Back to the main topic. This year the NSU has been active; it has sponsored and organized a home-school coordinators panel discussion and a dinner for forty people, not large but the experience was the important thing. The NSU provides (or can provide) a unique vehicle for its members to speak before students at all levels, teachers, and just about anyone you can think of. Future projects of the NSU include a summer series of films, speaking before high school audiences, art exhibitions of Indian paintings, drawings, etc. on the UVic. campus, seminar discussions of books concerning aspects of contemporary native Indian life, getting involved in field work in various provincial schools which have programmes and or classes specifically concerning aspects of native life (e.g. Indian art classes, Indian history classes, Indian language classes, to name a few).

Next year I will be one of the very few Indians with a degree who will be on welfare so I won't be here to see any of you students who might be coming to UVic. Too bad. But there will be others so come on in and meet them!

P.S. I was only kidding about going on welfare. My mother would kill me!

If you have a car these people have a place

Traffic and Security

All motor vehicles, driven or parked on campus between 7:00 a.m. and 6:00 p.m. Monday through Friday and between 7:00 a.m. and 12:00 noon Saturday, by faculty or staff, students, and by persons whose normal place of employment is on campus must be registered with the university.

General parking fee for students is $5.00 a year. A general parking permit entitles the holder to park in any general or unreserved lot.

The fine for a traffic violation is $2.00, payable at the Traffic and Security office in the Saunders building not later than the last day of the next calendar month in which the violation occurred. If a fine is paid prior to 4:00 p.m. of the second working day following the issue of the ticket it will be reduced by the amount of $1.00.

- Students who drive cars which are registered in an area other than Victoria are reminded this does not exempt them from the law that requires a valid inspection permit on their windshield.

Local police have issued this reminder in the hopes of saving someone the price of a ticket. Despite the fact that they are from out of town, they must have a permit if they are residing or driving in this area for the school year.

Geography:
a variety of alternatives

Geography is an integrative, environmental discipline with one foot in the physical sciences and the other in the social sciences. Although the social science aspects of the discipline are emphasized at the University of Victoria, there is a solid component of physical geography within the Department.

A basic aim is to offer a balanced program within the discipline, as well as several areas of specialization. First and second year courses are intended to provide a fairly broad background in geography that may constitute a foundation for specialization in third and fourth years, or simply an introduction to a balanced upper year program that does not emphasize a particular field.

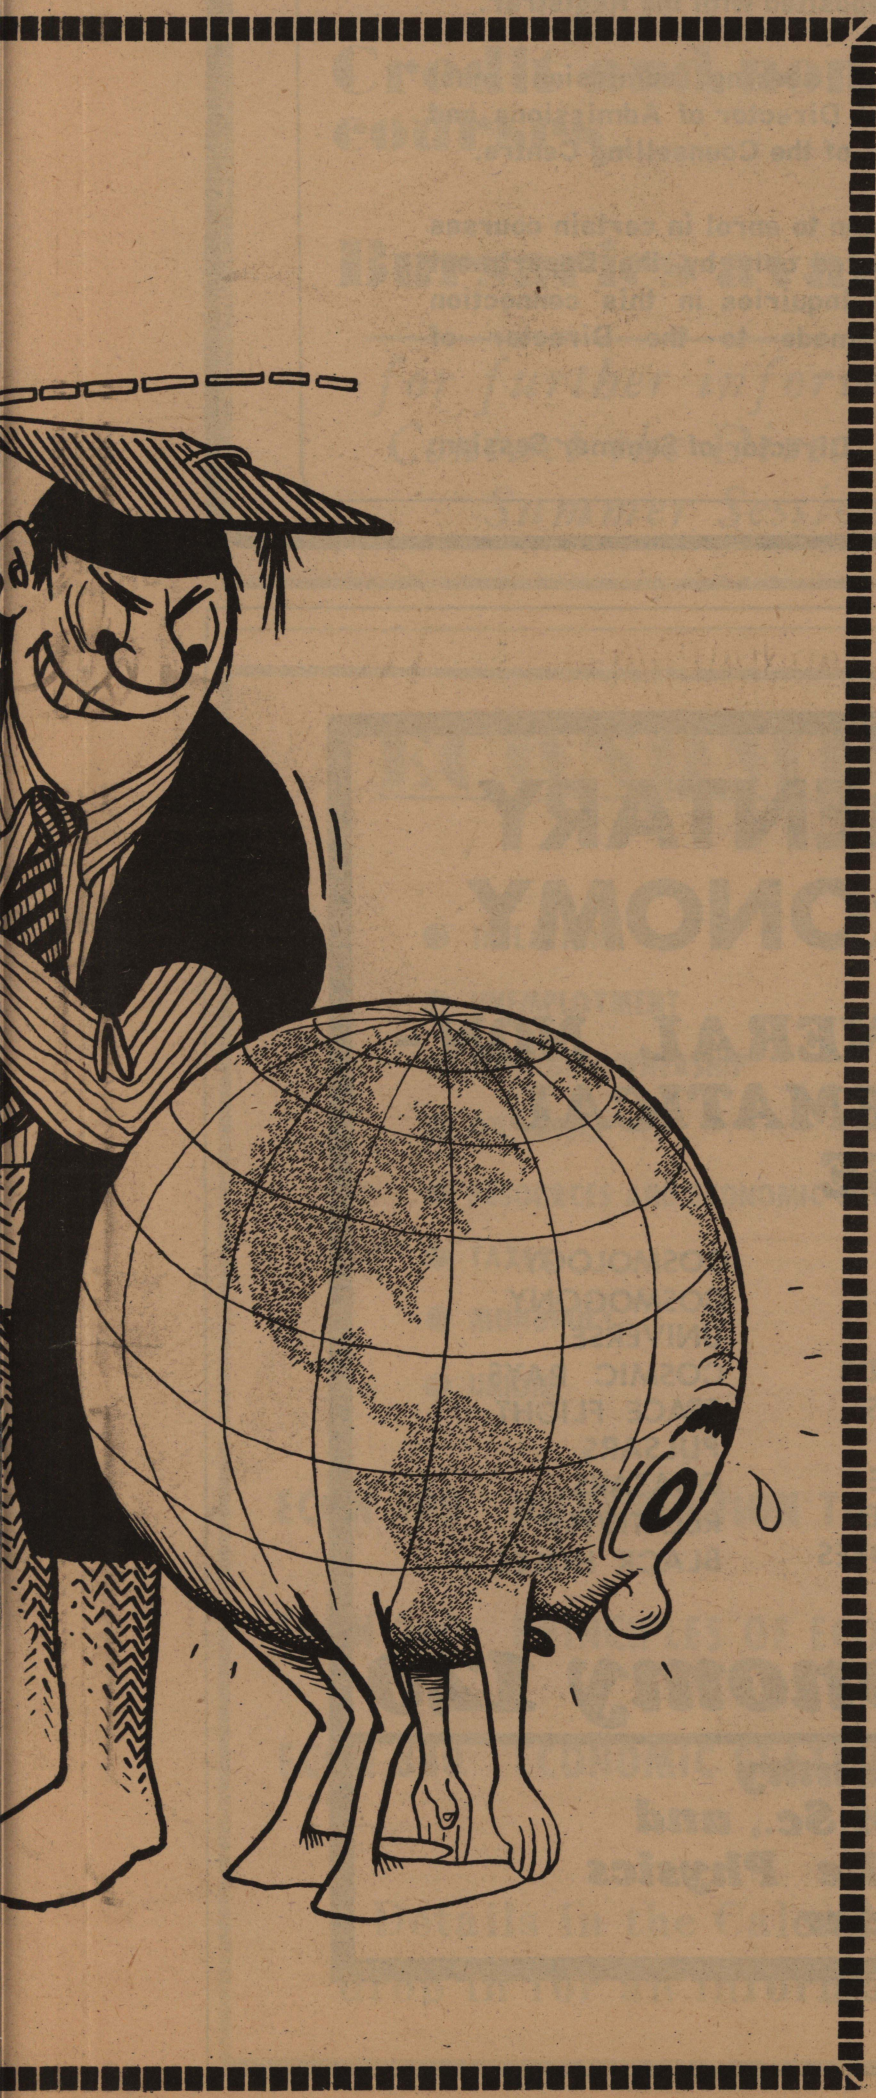
Most students seem to prefer the pursuit of specialization to a certain degree and the Department has developed three major specialities to meet this need: Resources, Urban and Western Canada-Pacific.

The presence of a number of well qualified faculty members in each of these areas provides both teaching and research expertise that make the specialties viable options for both undergraduate and graduate students.

There is an increasing awareness that resources management has immense physical and social ramifications, profoundly affecting the quality of life and the standard of living. The resource studies program provides a conceptual framework that enables rational assessment of resource management decisions.

A student focusing on this aspect of geography is trained as a "specialized generalist," capable of understanding the consequences of a potential resource yet able to view the significance of that resource to society as a whole.

Specialization in resource studies begins at the third year level where several courses with this orientation are offered. These include a general introduction to resources which deals with the form, inherent characteristics, and interrelationships of various natural resources and considers the problems that arise from their utilization.



SPECIALIZED COURSES

More specialized courses include hydrology, geomorphology, climatology, biogeography, and applied aspects of each of these fields of physical geography. This embraces such studies as water resources, mineral resources, and forest climatology.

The Department also has a specific interest in recreational resources. Complementing these systematic courses are others which are technique oriented, including those dealing with the law and administration, perceptions and attitudes, and regional development of natural resources.

Seminars dealing with physical and human problems relating to resources management are also offered at the undergraduate level.

Cooperation has been established with numerous other departments concerned with resources studies, and students are encouraged to select from courses offered by the departments of Biology, Anthropology and Sociology, Psychology, Political Science and Economics.

Liaison has also been established with various federal and provincial agencies concerned with practical aspects of resource management.

Career opportunities are found particularly in the various levels of government and education, in industry and in private consulting where there is concern with resource evaluation and management, pollution of the environment, and the need for environmental impact assessment and regional planning.

URBAN STUDIES

The study of cities is an appropriate specialty in a nation where rapid urbanization and accompanying urban problems are of increasing concern to governments and to Canadian society as a whole. The urban geography program consists of third and fourth year courses and graduate seminars.

An introductory urban geography course is offered at the third year level, along with supporting courses, especially industrial geography, transportation and commodity flows, and regional analysis. Fourth year courses are more specialized, focusing on planning, transportation, urbanization in regional contexts, and behavioural approaches to urban study.

The planning oriented courses are urban transportation and land use planning, and development and planning of the urban region. The seminar on urban geography of Canada and the course on urbanization in developing countries deal with a wide spectrum of urban characteristics and urban problems, in a western culture in the former case and in a variety of other cultures in the latter case. The spatial dynamics of urban behaviour, including neighbourhood interaction, and perception and attitudes within the urban system, is studied in urban social geography.

Valuable support courses are available in other social science departments and geography students are encouraged to take appropriate local government, urban economics, sociology, and psychology courses in conjunction with their geography selections. In addition, urban geography studies may complement many other programs, especially those oriented toward some aspect of the environment. Accordingly, students pursuing studies of water resources, pollution, microclimate, recreation resources or other environmental specialty may wish to concentrate on urban-based phenomena.

A CHALLENGE

The rapid growth of cities and the seriousness of associated urban problems presents both a challenge and an opportunity to those who become qualified to participate in the search for solutions. Metropolitan and regional levels of government are evolving with a need for trained personnel. Below this level local governments continue their more localized survey and planning activities. The federal government has recently established a Ministry for Urban Affairs and employs significant numbers in urban research pursuits. The field of professional planning generally is entered through qualification at the graduate level and a strong undergraduate preparation in urban studies provides a good background for entry. Other examples of the greater demand for urban-oriented expertise can be cited in business and industry where activities such as retail and industrial site location, market research and advertising are carried out.

Rather than focus on a large number of world areas it is Department policy to be concerned with two major regions. Western Canada is an obvious choice. It includes studies of the local area, British Columbia and the Prairie Provinces, and the resources and urban problems of Western Canada. The "Pacific" is an area of the Western Pacific from the Soviet territories in East Asia to Australia and New Zealand, and includes Oceania. This is an area vital to the future of Canada, a laboratory of social change and geographic variety, and a region in which students may learn much more about the character and problems of other cultures. All courses that focus on Western Canada and the Pacific are under the supervision of instructors who have actively engaged in field research and travel in their areas. Several instructors have the added qualification of reading and speaking appropriate Pacific languages.

Introductory courses on Canada and the western Pacific Rim are offered as foundations for more specific studies in upper years on Western Canada, Soviet Union, Japan, China, Southeast Asia, Australia, and the South Pacific. Numerous other courses in urban, economic, cultural, resources and physical geography lend strong support. Outside Geography, courses in the Pacific Studies Program are Particularly appropriate, as are courses in Anthropology, Sociology, History, Economics, languages and Linguistics.

Canada is becoming far more oriented toward the Pacific area in trade and cultural contacts than it has been in the past. This is particularly true for British Columbia, and the provincial government is developing much closer liaison and economic interrelationships with Japan and other nations of the Pacific. Also, the development of expertise on Western Canada is important to the provincial government. A general Pacific orientation can provide the graduate with an advantage over other candidates who are applicants for positions in External Affairs, Trade and Commerce, airlines concerned with the Pacific area, travel agencies, export-import organizations, and businesses engaging in trade with the Western Pacific.

Housing Scarce

Victoria has an acute shortage of housing and students are warned to make sure they have a place to live if they are coming to UVic in the fall.

Shirley Baker, the head of Housing Services warns students against showing up in Victoria in September with the hope of finding an inexpensive, comfortable place to sleep in a day. She said the high demand for housing makes it difficult for students looking for a place for the winter.

Mrs. Baker suggests students try and get a day or two off work during the summer and come down to look for a place. The Housing office has listings of apartments and housekeeping rooms. She advised against taking a place sight unseen. Mrs. Baker also said the University Residences could have a few vacancies as some people cancel in September.

Summer Session

July 2 to August 15

Beginning with Summer Session 1965, the Senate of the University made special provisions to enable students to enter directly from senior secondary school. The Senate requirements pertaining to such students are as follows:

(a) A student may elect two courses provided that those courses do not have laboratory requirements.

(b) A student may elect only one course if that course has a laboratory requirement.

(c) Registration will be tentative and will be confirmed only when an official statement showing graduation from senior secondary school is deposited with the Registrar.

(d) Students seeking admission must interview the Director of Admissions and the Director of the Counselling Centre.

(e) Permission to enrol in certain courses will be granted only by the Department concerned. Inquiries in this connection should be made to the Director of Admissions.

Director of Summer Session.

Child Care Training Programme

●

This programme is designed to provide professional training and experience for men and women to train children in residential and Day Care Centres.

●

Training is offered in eight areas of specialization.

The study and care of

- mentally retarded children
- emotionally disturbed children
- neurologically impaired children
- those with child psychosis
- those with severe learning disabilities
- those in minority groups
- those treated in their own homes

and

normal pre-schoolers in Day Care Centres

This is a liberal Arts B.A. programme, courses being chosen by the student from all Faculties in the University. In addition to the B.A. , the student will receive a Diploma in Child Care on completion of 16 months of successful practical experience in a variety of agencies.

Employment opportunities are equal for men and women.

Further information may be obtained from Dr. Roger Ruth, Acting Director, Local 890.

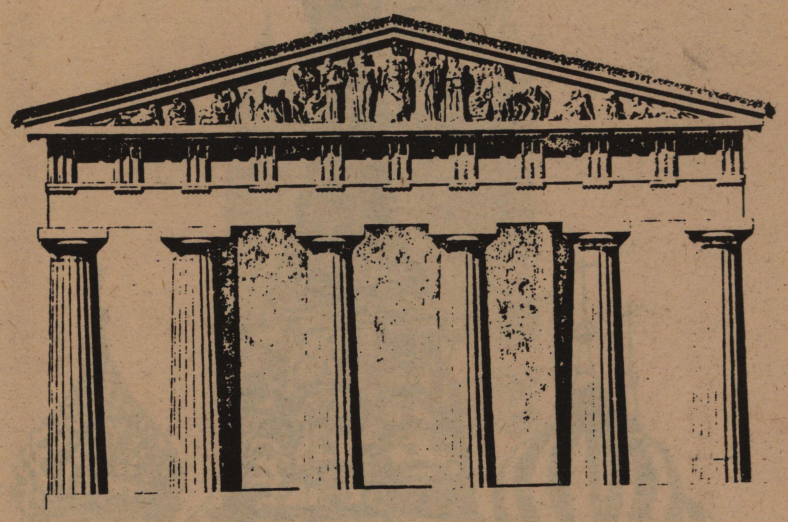
Department of

Classics



Why not study a Classical language this year?

You may take **Latin 100**, 200 or **240**, according to your qualifications, and **Greek 100** caters for beginners. The aim in all these courses is to help the student to read the language as soon as possible.

Or take **Classical Studies 100** and learn something of the civilizations of Greece and Rome; study Homer, Sophocles, Plato, Virgil and other writers in translation; examine some central ideas of ancient politics, religion and philosophy and assess the artistic achievements of the Greeks and Romans. There are frequent slide lectures.

Why take...

- Russian
- Serbo-Croatian
- Chinese
- Japanese ? ? ?

Slavonic and Oriental Studies

Reasons...

- Russian, Chinese and Japanese-three most important world languages.
- Canada and the U.S.S.R.-two northern countries. Canada, U.S.S.R., China, Japan-windows on the Pacific.
- Careers: Business, Diplomatic Service, Journalism, Translating, Interpreting, Teaching, Tourism.
- Increased Scientific and Technical Co-Operation, Scholarship and Exchange. Rich literature and civilizations.
- Tourism

Did you know that...

-the Russian alphabet can be learned in 30 minutes and that Russian is no harder than English, French or German?

-the Department offers a complete range of courses including a B.A. programme in Russian language and Literature?

Russian is a recognized teaching area in cooperation with the Faculty of Education?

-28 per cent of the world's scientific literature is published in Russian and that you can take a rapid, one-year reading course (Russian 390) designed for students who wish to read specialized literature in any area of the Humanities or Social and Natural Sciences?

Three of our courses are given in English translation and are open to all students: Soviet Literature, Tolstoy and Dostoevsky, Russian Culture.

-you can take a second Slavonic language, Serbo-Croatian the language of Yugoslavia?

-there are exchange programs for students to the USSR, Poland, Bulgaria and Yugoslavia?

Chinese

A language spoken by 800,000,000 people, Chinese deserves our attention in today's world. Chinese grammar is extremely simple and the 4 tones in Mandarin Chinese can be mastered after a few weeks' study. A knowledge of 1,000 Chinese characters will enable you to read simple modern Chinese.

First and second year courses are offered in Chinese language as well as a course in Chinese culture.

Japanese

A knowledge of the English alphabet is all you need in order to begin learning Japanese! The pronunciation is very simple and there are no tones to learn. A one year course will give you a command of simple spoken and written Japanese. First and second year courses are offered in Japanese at UVic.

Pacific Rim Programme

A knowledge of Russian, Chinese or Japanese will prove invaluable to students specializing in the University of Victoria's interdisciplinary Pacific Rim Programme.

All parking areas inside the Ring Road marked with letters are for reserved parking only with the exception of the meter parking noted below. The areas outside the Ring Road marked with numerals are general parking.

Hourly meter parking exists in parking areas A, B, C, D, E, 2, 5, and N. A daily paid parking permit can be purchased from machines. This ticket can be used in any general or non-reserved parking area.

HISTORY

Courses Recommended For First And Second Year Students

HISTORY 210 (3 units) History of the United States

A general survey of the history of the United States of America from the colonial period to the present. This course is strongly recommended to students wishing to take advanced courses in American history.

HISTORY 220 (3 units) History of England

History 220 is designed as a course for those who wish some acquaintance with the broad sweep of British history since the Norman Conquest. This course is strongly recommended to students wishing to take advanced courses in British history.

HISTORY 230 (3 units) History of Canada

A survey of Canadian development from the beginnings of the French regime to the present. This course is strongly recommended to students wishing to take advanced courses in Canadian history.

HISTORY 234 (3 units) Main Currents of Western Thought

A survey of the most influential ideas and intellectual movements of western culture from their origins, in Greece and the Middle East, to recent times. Not open to students who have credit for History 400.

HISTORY 236 (3 units) A Study of European Civilization from the Council of Nicea (325 A.D.) to the Congress of Vienna (1815): Doubt, Inquiry, and Affirmation

This course will serve to provide a general introduction to the study of European Civilization and the origins of Western society. This course, or History 240, is strongly recommended to students wishing to take advanced courses in European history. There are no prerequisites. Not open to students who have credit for, or are currently enrolled

HISTORY 240 (3 units) History of Modern Europe

A survey of European history from the Renaissance to the early twentieth century. This course, or History 236, is strongly recommended to students wishing to take advanced courses in European history. There are no prerequisites. Not open to students who have credit for, or are currently enrolled in, History 236.

HISTORY 242 (3 units) Main currents in Twentieth Century History

This course offers a background for contemporary world problems, surveying major historical developments of the twentieth century.

HISTORY 252 (3 units) History of the Far East

An introduction to the political, social, economic and philosophical developments in the Far East.

Telephone 477-6911 (local 268) or drop in to Cornett 374.

1. to request additional information about these courses.
2. to request information on advanced courses.
3. to receive a complete listing of courses offered.
4. to make an appointment with a departmental advisor.

DEPARTMENT OF

FRENCH

First year

French 100 Beginners' French

This course is an intensive introduction to spoken and written French with emphasis on oral work. Note: it is not available to students having credit in French 11.

French 160 Elementary Composition and Oral Practice

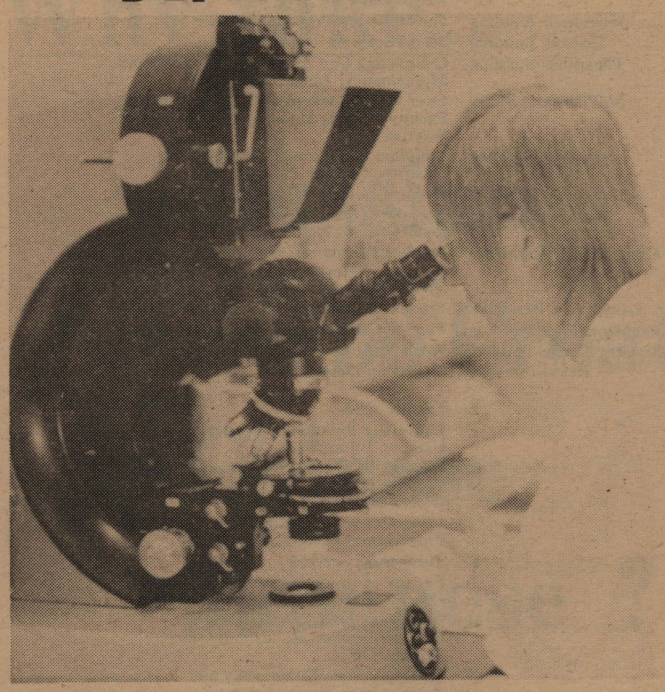
Instruction in French grammar and composition, based on a grammar text and on numerous short readings. Note: Prerequisite French 11; the course is not open to students who have completed Grade 12 French.

French 180 French Language and Literature

A study of contemporary French texts, grammar, composition and pronunciation. This course is intended for students wishing to major or take honours in French. Note: Prerequisite French 12.

For further information 'phone 477-6911 (Local 247) or visit us on campus on the fourth floor of the MacLaurin Building.

DEPARTMENT OF BACTERIOLOGY BIOCHEMISTRY



— Bacteriology concerns the science of unicellular life. It is involved with the control of infectious diseases in man and beast, plant science, control of food supplies, beer and wine production and ecological control of biological and chemical pollution and the environment. The demand for Bacteriologists at the technical or professional level is high and is expected to increase.

— Biochemists search for explanations of the life process in terms of interactions between chemicals characteristic of biological systems. Biochemistry influences virtually all of science. Doctors, Dentists, Veterinarians, Agriculturalists and Biologists find Biochemistry essential in their training programmes. To Chemists, Physicists and Engineers, some knowledge of Biochemistry is often indispensible.

— Most courses offered by the Department are open to all students in the university. Bacteriology 200 and Biochemistry 300 are the introductory courses at the present time. Students wishing to pursue an honours degree should consult with the Department in choosing their programmes.

— For further information telephone 477-6911 (local 419) or come to Building N on campus.

Financial aid...

Want to go to University but can't afford it?

Assistance is available for those who need it, and "no student with a legitimate reason for needing help shall be denied it", says Nels Granewall, UVic Financial Aid Officer.

Where the funds available to students from their parents, summer work or other sources are insufficient to meet educational costs the most likely form of aid is a student loan.

REQUIREMENTS

To obtain one there are no age restrictions but it is necessary to be a Canadian citizen or have landed immigrant status at the time of application and have at that time lived in Canada for a year or more.

Students studying in Canada on visas are not eligible.

Also it is necessary to have been a resident of British Columbia for at least twelve months prior to applying for a loan from B.C.

Other requirements are that you intend to take a full academic load and that you satisfy the loan authorities that your summer savings and-or your parents' income are insufficient to enable you to meet the educational cost of a year's study.

With the recent announcement from the Minister of Education a student will not have to borrow all the additional money he or she needs to go to University. If the student fulfills the requirements for a Canada Student Loan the B.C. government will match half of the additional monies needed in a non-repayable grant. This means the student will only have to borrow half the money he needs from the federal government. Students should see the Financial Aid Officer to find out exactly how this is going to work.

GETTING THE LOAN

What is the first step in getting a loan?

For students planning to attend UVic it's necessary to apply to the Financial Aid and Awards Office.

Shortly afterwards, you will be advised by the provincial authority about whether or not your request has been accepted.

If a loan is approved, you will be issued a "Certificate of Eligibility".

Upon receiving a certificate it is necessary to take it to the institution you are planning to attend to have your enrolment confirmed. Within thirty days of that you must take the form to any Canadian chartered bank branch or other lending institution designated as a bank by those in charge of the plan.

At the bank you must declare any previous Canada Student Loans you may have had and if these are at any other branch of any bank arrange transfer of the loans before you can complete negotiation of your new loan.

These must be in order before a transfer can be made.

It is not necessary to put up security for a student loan or have anyone other than yourself sign the loan agreement.

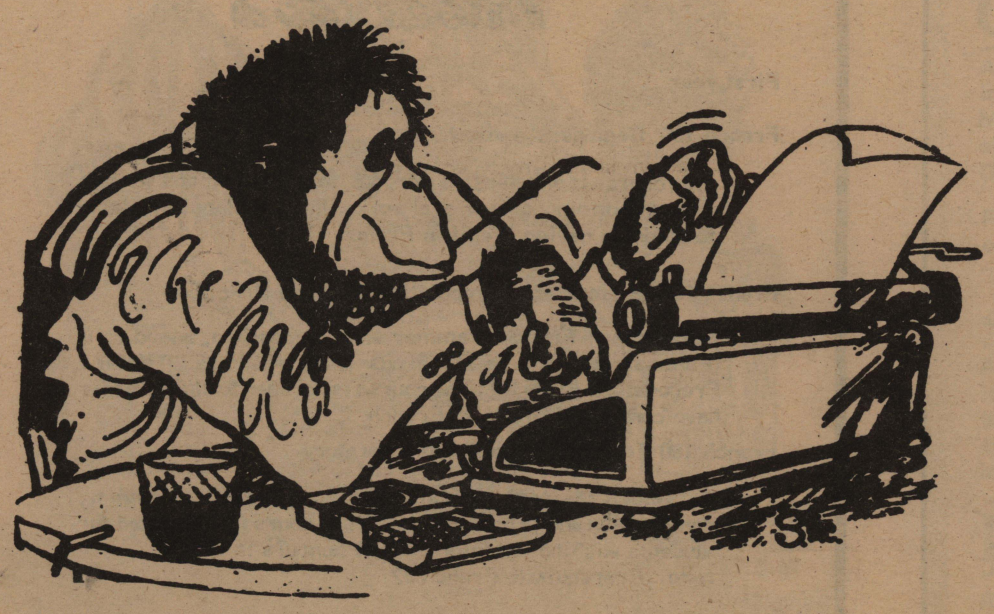
Provided that in each academic year or semester in which you are a full-time student you furnish your bank with official proof of enrolment, the loans you obtain under the Plan will be interest-free.

The grace period extends during the period of enrolment and for six months afterward.

During this time the Federal Government pays interest to the bank of your advances.

The Martlet always needs staff.

If you're coming to UVic next year and want to write, edit or do lay-out work on the student newspaper why not drop in at the Martlet? As long as you're studying you may as well pick up a useful/saleable skill. We have a fully equipped production shop and all the training's on us!



The Martlet is in the S.U.B. 477-3611

...is available

OBLIGATIONS

You are expected to repay the total amount of your debt over a time-span of up to nine and a half years after the expiration of your six-month interest-free period, depending upon the size of your debt and probable ability to repay.

There are of course those who have trouble getting student loans.

One of the largest obstacles is something called "the mandatory contribution from summer earnings."

What it means is that those students who are employed in the summer yet who still need a loan to finance their studies, are expected to come up with a certain amount of money before being granted government assistance.

Another problem area is the "responsibility" parents have to pay for the education of their university children living at home.

Granewall says the main reason why many students don't get financial aid is because the government expects their parents to contribute more money than they are able to do.

It is a principle of the Canada Student Loans Plan that parents must pay for their children's education according to their means.

"Since families and students are expected to contribute to educational costs in proportion to their resources, neither students nor their parents may transfer this financial responsibility to the province on the basis of arbitrary decisions made by them", an official brochure states.

Without substantial outside support it is impossible for them to pay educational costs if they have more than one child going to university or if the child lives away from home.

But what happens when a loan application is rejected out of hand, as in the case of a student who has wealthy parents but does not live at home and has no connections with his family?

A situation like that does not necessarily mean the end of the road as far as getting government money is concerned.

APPEALS

It is possible to lodge an appeal with the Department of Education's Student Affairs Branch, but only with the help of the University Financial Aid Officer.

Private appeals are not considered.

The student must come to the UVic Financial Aid Office with supporting evidence to prove the claim of non-contact with his parents.

Support may come in the form of a letter from a high school counsellor or some other influential person, a clergyman for example.

If a loan is still not forthcoming the student may request the Financial Aid Officer to petition the B.C. Youth Foundation for aid.

Again, no private appeals are considered.

The Foundation is a private agency which among other things provides interest-free loans to needy students.

When the student gets a job "there is an expectation of repaying the Foundation at about ten percent of his income, although there is no proscribed rate", says Granewall.

One further problem with the Canada Student Loans Plan, a bureaucratic rather than an economic one, is that students in the past have been asked to supply with their loan application a large number of documents.

SPANISH

The language of Spain, Mexico, Cuba, Central America, and most of South America (Brazil excepted)

ITALIAN

A major European language with strong representation in areas of Canada

Beginning, intermediate and advanced language courses

Department Of English

First Year

ENGLISH 111 - Basic Composition (1½ units)

ENGLISH 115 - College Composition (1½ units)

ENGLISH 121 - Literature of English Speaking Countries: Prose Fiction (1½ units)

ENGLISH 122 - Literature of English Speaking Countries: Poetry and Drama (1½ units)

Results from the Senate Qualifying Examination in English will determine eligibility for English 111.

Second Year

ENGLISH 200, the Department's basic Second Year course has been revised and now surveys great British literature from the Age of Chaucer to the Romantic period. It will be taught by the following instructors: Dr. M. Best, Dr. J. Cox, Dr. T. Dombrowski, Dr. A. England, Dr. A. W. Jenkins, Dr. F. Mayne, Dr. S. Macey..

ENGLISH 201 -

Studies in Modern Literature. The emphasis will be upon themes important in twentieth century literature. Authors to be studied may include Shakespeare, Joyce, Forster, Fitzgerald, Hardy, Hemingway, Camus, Cary, Beckett, Lawrence, Conrad, Tolkien, Bellow, T. S. Eliot, Patrick White. It will be taught by the following instructors: Dr. N. Alford, Dr. T. Dombrowski, Dr. C. Doyle, Dr. I. Ferris, Mr. G. Forbes, Dr. J. Peter, Dr. D. Tolomeo, Dr. A. Edwards.

ENGLISH 210 -

Backgrounds to English Literary Tradition, Classical and Biblical, taught by Dr. J. Cox.

ALSO English 203, American Literature, English 204 and 205.

Canadian Literature

ENGLISH 238 -

An introductory course in Canadian Literature has been created in response to student demand. The course will include prose and poetry from 1770 to World War II, emphasizing keynote figures who have helped to shape Canadian sensibility, and with a view to defining the distinctiveness of Canadian cultural traditions. An essential course for any student of Literature, Education, or Canadian Studies. Taught by Dr. R. Sullivan Beardsley and Dr. R. Lawrence.

ENGLISH 448 -

Studies in Canadian Literature. Students will read the best poetry, fiction, and drama written in Canada since World War II including works of leading Quebecois authors in translation. Taught by Dr. R. Sullivan Beardsley.

Telephone 477-6911 (local 524) or drop in to Sedgewick 48

1. to request additional information about these courses,
2. to request information on advanced courses,
3. to receive a complete listing of courses offered,
4. to make an appointment with a department advisor.

FACULTY of LAW

Commencing
September, 1975
the Faculty of Law will
offer a three-year program
leading to the degree of
Bachelor of Laws.

For further information, contact:
F. Murray Fraser
Dean of Law
University of Victoria
P.O. Box 1700
Victoria , B.C. V8W 2Y2

LINGUISTICS

The Study of Language?

1. Why Take Linguistics?

You use language every day. The moment you begin to talk, people decide what kind of person you are. It is a good idea to learn all you can about something that tells everything about you.

2. What Can You Study?

You can study basic facts about language: how it works, how it is learned, and why some people use it better than others. You can learn the reason that there are several thousand languages in the world. You can use Linguistics to help you in your study of French or German or any other language. You can learn to teach English as a Second Language. You can prepare for a career in Speech Therapy.

Write to

The Department of Linguistics

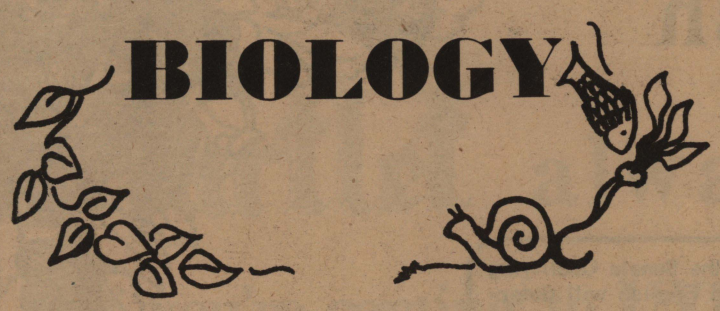
BIOLOGY



Program of courses is available for specializing in marine biology, ecology, and botanical and zoological sciences.

Courses required for all students include: introductory biology (or Biology 12), introductory botany, and zoology, genetics, ecology, cell biology, and physiology. A wide range of electives is available.

Recommended high school preparation for Biology major: grade 12 biology, chemistry or physics, mathematics.

OPEN COURSES: (no prerequisites) - Introductory Biology (150), Oceanography (310), Plants & Man (334), Environmental Issues (316), Economic Entomology (313).

Pacific Studies

An interdisciplinary programme leading to either a general or a major degree in Pacific Studies is now available at the University of Victoria.

Why Chose Pacific Studies?

Today Canada is looking increasingly towards the Pacific. Relations with Japan have never been more active. New relations in trade and cultural exchange have opened with China. Canada's interests in Southeast Asia have been developed further than ever before and Canada's external policy stresses greater awareness of Australasia and the Pacific Islands. Within the area lie diverse cultures and the bulk of the world's population. Developments within the region will contribute significantly to Western Canada's future for decades to come. New opportunities are opening for well-qualified students especially with a mastery of a Pacific language, in external affairs, tourism, export-import companies, transport and finance. For the generalist the programme offers a wide horizon, encompassing contemporary problems of great relevance to today's world.

Students wishing to pursue Pacific Studies should consult the Director, Pacific Studies Programme, or any committee member (see University Calendar), as early as possible. Consultation and a partial commitment in the first and second year will allow time for a worthwhile selection of appropriate courses.

The Programme

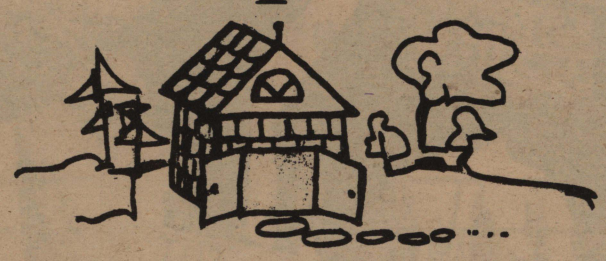
The introductory course starts in the third year. Some students will be qualified to start in the second year. Normally the first and second years will be used to best advantage by completing supporting courses in a number of departments. Appropriate languages are specially recommended.

The Core Courses (Twelve Units)
Essential courses for the major are as follows:
Pacific Studies 300 (3)
Themes and Problems of the Pacific
Pacific Studies 400 (3)
Seminar in East and Southeast Asian Studies
Pacific Studies 401 (3)
Seminar in Australasia and the Pacific Islands
Pacific Studies 490 (3)
Directed Studies (designed for the individual student)

UNIVERSITY OF VICTORIA

Biology Department

Open



House

For Senior Secondary Students

An opportunity to speak to professors and attend lectures and laboratories of classes in session on March 11 and 12.

****

Consult your biology teacher for details.

Further information and guides will be available at the main entrance to the Cunningham Building.

A Key Ingredient To Any Professional Career

To meet your needs we offer two first year courses.

CHEM 120 for B.A., B.Sc. General Degree and Pre-Professional Candidates

CHEM 124 for Chemistry B.Sc. Degree and Pre-Professional Candidates

CHEMISTRY

Political Science: studying the relevant and contemporary

The Department of Political Science at the University of Victoria has a programme in political science of considerable interest to students entering university in 1975.

The University of Victoria is the only university in the province to offer a course in Canadian Government and Politics for first year students. The course is designed to develop the students' interest in and awareness of the nature of Canadian politics. It covers the whole scene from the machinery of government to the workings of the political parties and the nature of the power relationships in federal politics.

Politics 100 is not simply an introductory course for students who want to continue in political science, it is an essential basic course for anyone with an interest in the how and why of politics in Canada. And that means most students.

During the year students will have an opportunity to hear and meet federal and provincial politicians; and, of course, the programme will take full advantage of the proximity of the provincial legislature to the university. If a student is interested in Canadian politics, this course is clearly the answer.

The second year programme in political science has been revised in order to offer students at that level an opportunity to discover the varieties of political science in a precise and intriguing way. Six one term course provide an introduction to the areas of concentration in political science in the department.

Politics 201 provides an introduction to modern ideologies -- today's "isms" -- through an examination of those political doctrines that are most relevant to Canadian political life: nationalism, conservatism, liberalism and socialism. Politics 210 introduces the student to the area and terminology of comparative government by looking at the systems of government in other countries such as the U.S., the Soviet Union, Britain, France, etc. Politics 220 deals with the relationship of courts to politics and law. Politics 230 deals with the analysis of political behaviour -- an investigation of why people vote as they do, how decisions are made and leaders chosen. Politics 240 offers an initial insight into the world of international politics and foreign policy, while Politics 250 examines the field of public policy formation in Canada -- the study of public administration.

Students often ask what political science offers in the way of career training -- obviously a degree in political science isn't a prerequisite for election to parliament (although the Prime Minister has one!). What political science does do is prepare students for a variety of careers in both the public and the private sectors. It also serves as a highly desirable background for professional training in law, teaching and public administration. One area in which political science graduates are increasingly sought is the public service in such fields as general administration in various government departments at the federal, provincial and local levels, and, particularly, in external affairs. Most foreign service officers have some background in political science, especially in international relations. Journalism is another area in which political science graduates are in demand, and that would include radio and television journalism as well as the press. A majority of graduates from the Carleton University School of Journalism took their undergraduate degree in political science.

An increasing number of secondary schools are either giving or considering including political science in their social studies programme. The University of British Columbia faculty of education now accepts a B.A. in political science for the B.Ed. programme. In other words, teaching is another career open to students in political science.

Teaching, Foreign Service, Public Service at all levels, and public affairs broadcasting and writing are occupations that welcome the graduate in political science. For the more scholarly, postgraduate studies to the Ph.D. level can follow and a position in a university could ensue.

But beyond these specific career goals is the fact that knowledge of how nations are governed is valuable in itself -- an essential part of a liberal education.

Always current, always challenging, political science is a study that offers students the relevant and contemporary: it is concerned with what is happening now, with the men and women who make the decisions that affect our lives today. With a focus on Canadian national and provincial politics, on public law and administration, the department at the University of Victoria is unique. For the serious student and for the student who merely wants to know more about how this country is run, political science at Victoria is a programme that will stimulate and challenge.

Your AMS fee supports your clubs

When you pay your A.M.S. fee of $32 - about a $1 - goes to the Clubs Council. All totalled this amounts to $10,000 to $12,000. Consequently the Council is in a strong financial position to purchase equipment for student groups which no individual could afford to buy for himself-herself. They can and do provide students with the equipment and funds to participate in interesting, unusual and otherwise costly activities.

For frosh, clubs are a way to meet a lot of great people. If you want to start a new club - go ahead. The Clubs Director is always willing to help - just drop by the Council Office and he'll help you with all the paperwork needed to establish your group.

WHO REALLY RUNS THIS COUNTRY?

- PARLIAMENT?
- TRUDEAU?
- BIG BUSINESS?
- TRADE UNIONS?

POLITICAL SCIENTISTS KNOW.

POLITICAL SCIENCE 100 . . is all about the government and politics of Canada

TAKE IT . . . . . it's a prerequisite to almost everything, especially citizenship.

(...and it leads to all sorts of fascinating things,

like Political Science 230, 340, 465 ...)
